

LEONARD CUENCA ROA

Full Stack Data Software Engineer

Professional with over 10 years of experience in full-stack web application development (PHP, JavaScript, .NET C#, Java, Python) and management of SQL and NoSQL databases. I complement my technical expertise with a Master's degree in Big Data Analytics, which enables me to go beyond system construction.

My profile allows me to act as a technological Key Account Manager (KAM), understanding the strategic needs of key clients to design and implement full-stack solutions that process large volumes of data. My goal is to transform data into actionable insights, creating a competitive advantage and strengthening long-term business relationships. I am seeking a role where my dual expertise allows me to drive business growth through efficient, data-driven technological solutions.

EDUCATION

2024 - Actual

UNIR - University of Rioja, Spain

- Master's Degree in Big Data Analysis and Visualization - ONLINE

2009 - 2015

INFORMATIC ENGINEER

- Caracas - Venezuela
- Francisco de Miranda University

SKILLS

Años

- PHP 9 - Laravel 10 8+
- Js - TypeScript - JQuery 8+
- C# 4.0 - .Net Framework 4.0 - Aspx 3+
- Java 11 - ODTs - Spring Bots 4 5+
- Python - Django - Flask 6+
- Node Js - Express - REACT 6+
- APIs - Swagger - OpenAPI 6+
- Mysql - Postgresql 8+
- SqlServer - Oracle 6+
- MongoDB - Compass 6+
- ETL-Dremio-Cassandra 2+
- AWS[IAM, RDS-Elastic, Boto3] 3+
- Google cloud [IAM, Cloud Run, Cloud SQL] 2+
- Azure [Functions, Service, Storage, Pipeline] 2+
- Git - Github - Docker 5+
- Css - Sass - Metodo BEM 6+
- Bootstrap - Tailwind 6+
- Beginning SOLID 6+
- Clean Architecture - MVC 6+
- Method TDD - BDD 3+
- Scrum - Agil 8+
- UML - Cascade 6+
- Jira - Monday - Asana - Projet 6+
- Figma - Trello - Cardflow 6+
- Ubuntu - Mac - Windows 6+
- Prompt engineer - IA 4+
- Gemini - Claude - ChaGPT - DeepSeek 4+
- Data Cleaning & Deep Learning: TensorFlow, Keras, CNN, Model Training 2+
- Data Process & Data Visualitation: NumPy, Pandas, R, Process Image (PIL/Pillow), Data Scaling & Normalization, Tablue, Power BI 2+
- Deployment ML: Gradio, Integrations Web, Google Colab 2+
- Automatización Proceso - N8N 1+

EXPERIENCES

MAMPRO - Mexico City

ENERO 2025 - ACTUAL

Senior Full Stack Developer

- Microservices Development & Modernization (SASAR - ASEA): Optimized the architecture of a legacy system built with Java 19 and Spring Boot by restructuring and organizing web service endpoints to improve interoperability. Led the data modeling for technical file validation and managed the application lifecycle through containerization and CI/CD pipelines on Azure infrastructure.
- Critical Platform Evolution (RENAGAS - ASEA): Spearheaded the development of new functional requirements using Python and the Flask framework, performing database schema audits and optimizations in PostgreSQL to streamline complex queries. Ensured system stability through rigorous testing protocols and automated continuous deployment using Azure Pipelines.
- Legacy Architecture Optimization & Security (Internal Platforms): Executed the re-engineering of security modules and Role-Based Access Control (RBAC) within a legacy environment migrated to Laravel 10 (PHP 8.2). Integrated a centralized access control interface for multiple internal platforms using PostgreSQL, including comprehensive functional testing and automated cloud deployment via Azure DevOps.

GLENA - Mexico City

JULIO 2025 - DICIEMBRE 2025

KAM - Data Analyst

- I am responsible for a Mercado Libre account with over 1,000 active listings, overseeing the entire order cycle from publication to delivery. I produce detailed statistical reports to analyze brand and key product performance, enabling data-driven strategic decisions. I implement listing optimization strategies that have improved product positioning and visibility in search results, contributing to a 1.02% growth in sales last month.

American Institute research - Mexico City

AGOSTO 2021 - ABRIL 2025

Full Stack Developer

- Claro, aquí tienes la traducción del párrafo al inglés:
- Led the development of new requirements, microservices, and process improvements for the web platforms of the CFCRL and the Ministry of Labor, achieving tangible optimization in usability and efficiency using PHP 8 and Laravel.
- Successfully completed the development cycle for the SI-API - SIPAS platforms (.Net and C#), implementing functional enhancements that strengthened the Inspection Process Support System.
- Finalized and delivered the SGLLE system, establishing an effective solution for quality control in the digitization of documents for the Ministry of Labor of Mexico.
- Developed and implemented the COSER system, a support project with the Ministry of Social Work of Honduras and a flagship project for empowering and guaranteeing labor rights for a vulnerable population of low-income women.

INDRA - Mexico City

JUNIO 2019 - AGOSTO 2021

Senior PHP Developer Analyst

- Optimized the national 'Soy Usuario' platform, implementing a user-centric (UI/UX) redesign that streamlined the complaint management process and improved accessibility for thousands of users nationwide.
- Ensured the operational continuity and performance of the main portal for the Secretariat of Telecommunications through proactive maintenance, managing the development lifecycle, applying security patches, and optimizing frontend performance.
- Refactored key system components, which increased the portal's response speed by 25% and reduced technical debt, facilitating future implementations and scalability.
